Summary

Full Stack Web Developer with a background in patient assistance, massage therapy, and anthropology. Certified from the University of Minnesota and Trilogy Education Services coding bootcamp. Making a career change to bring fresh challenges to a puzzle-loving brain. Bringing well developed person-focused communication, time management, and organizational skills from former work and educational experiences. Adding to these new technical skills, strong logic, and a true love for constant learning. Seeking to create, build, maintain, and improve web applications that help people solve problems and do good work in the world.
